Career Objective

Computer Science Engineering student with strong foundations in Python, Data Structures, AI fundamentals, and problem-solving. Passionate about Machine Learning, Generative AI, and Agentic AI systems. Experienced in building practical projects involving automation, analytics, and intelligent applications. Seeking an AI Internship to apply technical skills and contribute to real-world intelligent solutions.

Technical Skills

Languages: Python, C, C++, JavaScript, SQL

Libraries: NumPy, Pandas, Git, GitHub

Web Technologies: HTML, CSS, React JS (Basics), APIs

Databases: MySQL, MongoDB

Core Concepts: Data Structures & Algorithms, OOP, DBMS, Problem Solving, AI Fundamentals

Projects

ClutterSense AI — Intelligent File Analysis System, *React | Flask | Python | File Analysis | AI Logic*
Built an AI-powered full-stack file analysis system using React, Flask, and Python to detect duplicate, large, and junk files while generating smart storage optimization recommendations.

AI Chat Analyzer, *Python | NLP | Machine Learning | Data Analysis | Generative AI*
Built an AI Chat Analyzer using Python to process and analyze chat data for extracting meaningful insights such as user activity, word frequency, engagement trends, and communication patterns. Applied NLP and data analysis techniques to generate intelligent reports and improve conversational understanding.

Smart File Organizer, *Python | File Handling | Automation | OS Module | Logic Design*
Built a Smart File Organizer using Python that automatically scans, classifies, and organizes files into structured folders based on type, extension, and naming patterns. Designed automation logic to improve storage management and reduce manual file handling.

AI Based IPL Auction System, *Python · OOP · Logic Design*
Engineered in a team of 10 people an interactive auction engine using OOP principles, enforcing dynamic bidding rules, budget constraints, and multi-team roster management.

Experience

04/2026 – 04/2026 **Frontend Development Intern**, *CodeAlpha*
Delivered practical mini-projects applying frontend fundamentals, reinforcing rapid prototyping, logical thinking, and end-to-end project execution skills.

02/2026 – 04/2026 **Front-End Development Intern**, *Codec Technologies Pvt. Ltd.*

- Engineered responsive web interfaces using HTML, CSS, and JavaScript, applying SDLC practices and clean code principles on live client projects.
- Diagnosed and resolved UI bugs systematically, strengthening debugging workflows and cross-functional collaboration in an agile environment.

Certifications & Training

Edunet – Foundation Course on Green Skills and Artificial Intelligence	Forge — Generative AI Job Simulation Software Engineering Job Simulation Cybersecurity Analyst Job Simulation	IBM — Python for Data Science & AI Development
AI For Techies – Python Using AI Workshop	Anudip Foundation + Mettl — Introduction to Programming 132 Hours Grade A1 (Oct 2025)	Udemy — Python for Absolute Beginners
Infosys – DHTML Training		

Education

2023 – 2027 **B.E. Computer Science & Engineering**, *Dr. D. Y. Patil Technical Campus, Pune*

- CGPA: 7.37 / 10.0 (Till 5th Semester)
